

## TOP PERFORMANCE Hay Feeders

When horses are your life, their health and safety are incredibly important to you. We understand this mindset. In fact, this mindset helps drive our mission: to develop quality feeding solutions for you and your animals.

Our feeders are designed with a focus on reducing hay waste and promoting healthy eating habits. They are built for ease of feeding, making your life easier, and giving you more time to enjoy your horses. Our products are all about you and your horses. We help your horses remain healthy and save you money.

### 45H

**Bale Capacity:**  
1-4 Small Square Bales  
**Dimensions:** 4' x 5'  
**Trough Height:** 35"  
**Weight:** 525  
**Feeding Capacity:**  
4-6 horses

The Model 45H is designed with a durable, bolt-on plastic roof that protects your hay and increases hay savings. A gate with a horse-proof latch on one end makes it extremely easy to load your hay into the hay basket. We also added a wide trough which prevents hay from falling, providing you additional savings. The 45H is also available with a slow-feed net basket.

### 45H Standard Features

Gated hay rack to make loading hay bales as simple as possible.

Skid feet and a D-ring for towing the feeder around the pasture.

A horse-proof latch to keep hay in and horses out (shown from outside).

### 4832G24

**Bale Capacity:**  
1-2 Small Square Bales  
**Dimensions:** 32" x 4'  
**Trough Height:** 30"  
**Weight:** 210  
**Feeding Capacity:**  
2-4 horses

The Model 832G24 holds 2-4 small bales providing daily feeding for up to 4 horses. Vertical bars prevent biting/teeth damage and decreases waste. A wide trough prevents hay from falling onto the ground, saving hay and money and providing max nutrition to your horses. We also added drainage holes in the trough to prevent water collection and mold growth. A 8' long version of this product (Model 832G24) is also available.

### 4832G8

**Bale Capacity:**  
1-2 Small Square Bales  
**Dimensions:** 32" x 4'  
**Trough Height:** 14"  
**Weight:** 195  
**Feeding Capacity:**  
Varies depending on animal species

The Model 4832G8 feeder is a great feeder for miniature horses, sheep or goats. The trough is 14" off the ground, putting it at the optimal height for your small animals. An 8' long version of this product (Model 832G8) is also available.
